Definitions:

FTP = File Transfer Protocol, the preferred method of uploading files to the Web. Web Browsers cannot upload files, so you need a separate FTP application.

HTML = Hypertext Markup Language. Web pages are displayed according to instructions in text files. The language used to tell web browsers what to display is called HTML.

JPEG, GIF, TIFF, PICT, etc. = Graphical file formats. JPEG is the most common format for photographs.

URL = Uniform Resource Locator. The address of a web page. For example, the SBMUG URL is "<http://www.sbmug.org>"
